Harry's 5 employment entries

Read this first

- **What the data shows.** The top-ranking editors have only **1–5 short, honest entries**. Edmond O. ($100K+) has 1. Isaac T., ranked #1 in Nigeria, has 1. The 3 Nigerian profiles with 100 entries, padded with fake employers, ranked worst (around #11–21) and had earned only $3–4K each.
- **What employment does for you.** It doesn't push you up in search by itself. It gives clients and Uma, Upwork's AI that matches freelancers to jobs, more matching words: short-form, Reels, TikTok, Shorts, podcast clips. It also shows your experience is real.
- **Only add entries that are true.** Fill every [blank] with your real client, page or dates. If one doesn't apply to you, skip it. 2–3 true entries beat 5 doubtful ones.
- **No client name?** It's normal to use "Freelance" or describe the client, e.g. "Lagos Fitness Coach (Private Client)". Never use a big brand you didn't work for.

If you only have a little real experience

- **Add Entry 1 now.** It's true as soon as you start freelancing as an editor.
- **Get real experience fast.** Offer to edit 3–5 clips free or cheaply for a local pastor, coach, podcaster or small business. Then you can honestly add Entry 2, 3 or 4, use the clips in your portfolio, and maybe get your first paying client.
- **Start your own page** (Entry 5). Post your sample edits there. That's real experience and a portfolio source at the same time.

Order on your profile

Upwork shows employment newest first. Put Entry 1 (Freelance, current) at the top. Keep 2–4 entries. Don't add old Roblox, web or AI automation jobs back: they mix your niche again.
